Timec T4000

Batch Encoder

designed for high volume check encoding with journal trial record keeping

The T4000 Batch Encoder was designed for high volume check encoding with journal trial record keeping.

The versatile T4000 is designed to take processing to its' simplest, most accurate, most readable level. A Proof department's greatest friend, this machine is capable of reducing rejects to zero.

Features:

- Ergonomically inclined keyboard with supporting palm pad to eliminate stress from the operator's wrist at all times during processing of checks.
- 8 Fields available, each can contain up to 20 columns, and each field can be placed anywhere on the document.
- Fully programmable keyboard, programs can be changed with a simple phone call.
- Keyboard self-test allows field technicians rapid diagnosis of problems.
- Unique stainless steel font and print hammer. Lifetime guarantee of at least 10 years use.
- Two retaining areas for work in progress.
- Open frame check channel decreases misfeeds, increases productivity.
- Built-in catch tray
- Oversized, backlit display for ease of reading, 40 column, 2-line array, command line and data line.
- Footprint: 16" x 10" x 7"
- Print Speed: 45 characters per second
- Standard E13B font, CMC7 available
- Surge suppressed power supply, 100V-240V, 50-60Hz
- Well established financial software provides batching and ticketing capability, along with grand totals for the end of each activity cycle.
- Unique error-eliminating Proof/Encode software is stand, as is simple batch encoding.

Optional Software Available: This includes "teller recall" for multiple operator summaries, and "smart key" for simultaneous, multiple field data entry.
