

Semacon 1600-CAD Series— Bank Grade Canadian Currency Counters

In your hands

\$100 starting November 2011

\$50 starting March 2012

\$20, \$10, \$5 coming by late 2013

Ease of Use

The S-1600 Series Premium Bank Grade Canadian Currency Counters were designed specifically to handle Canada's new polymer banknotes, even when mixed with paper banknotes. These counters are intended for use in high volume environments such as banks, credit unions, casinos and large retailers. They feature an intuitively designed control panel including a 10 digit keypad for batching along with buttons for commonly used features making these counters easy to operate in a variety of applications.

Ultra High Performance

These counters offer ultra high speed counting at up to 1800 banknotes per minute and are manufactured with high performance, full duty cycle components designed to run 24/7 for years in the harshest environments.

Efficiency and Reliability

Our SmartFeed™ Advanced Feed System Technology rapidly and reliably processes banknotes of all conditions ranging from very worn to brand new. Four variable counting speeds allow the operator to handle delicate bills at the slower speeds or maximize efficiency at the higher speeds.

Precision Counting Accuracy & Error Detection

Semacon Currency Counters are engineered with fully automated, advanced screening capabilities to thoroughly detect errors including double notes, chain notes, half notes, etc. Our counters ensure the most accurate total counts and are designed to offer years of trouble-free operation.

Advanced Counterfeit Detection Technology

Select models offer Semacon's SmartDetect™ Advanced Counterfeit Detection

Model	Counting Mode	Adding Mode	Counting Speed (Notes Per Minute)	Batching (Keys/Range)	Memory	UV Counterfeit Detection	MG Counterfeit Detection	External Display
